Professional Summary

- 📌 Computer Engineering graduate specializing in blockchain, cloud infrastructure, and secure software development. Experienced in Ethereum smart contracts, IT automation, and system administration using Java and Python. Strong interest in AI automation, cybersecurity, scalable systems, and Quality Assurance (QA). Familiar with testing tools such as Cypress and Jira, with a strong mindset toward software quality and reliability.

Education

- 2026 – Present 📌 **M.Sc. in Computer Science**, Princess Sumaya University for Technology — Amman, Jordan
- 2020 – 2025 📌 **B.Sc. in Computer Engineering**, University of Jordan, Amman, Jordan
- 2019 – 2020 📌 **High School Diploma (Tawjihi)**, Al-Jazeera School, Amman, Jordan

Skills

- Programming 📌 Java, Python, C++, Assembly, JavaScript, Solidity, SQL, MATLAB, Node.js, CSS
- Soft Skills 📌 Problem solving, analytical thinking, communication, teamwork, adaptability
- Tools & Tech 📌 AutoCAD, LaTeX, LabVIEW, Proteus, Jira, Cypress, academic research
- Languages 📌 Arabic (native), English (professional working proficiency)

Miscellaneous Experience

Experience

- 2021–Present 📌 **Freelance IT Support Technician** — Self-Employed
 - Installed and configured Windows operating systems and device drivers.
 - Performed hardware diagnostics and component upgrades (RAM, SSD, peripherals).
 - Removed malware and secured systems using antivirus and security tools.
 - Troubleshoot software, performance, and hardware-related issues for end users.
 - Provided ongoing technical support and system optimization guidance.
- Jun–Sep 2024 📌 **Electricity Distribution Co. (EDCO)**, Operating Systems Dept. — IT Infrastructure Intern
 - Automated administrative IT tasks using PowerShell to improve operational efficiency.
 - Managed Active Directory (ADDS) user accounts, password resets, and access permissions.
 - Assisted in Microsoft Azure and Microsoft 365 administration and user provisioning.
 - Provided Tier 1 technical support and maintained enterprise Windows-based systems.
 - Contributed to troubleshooting enterprise IT infrastructure and end-user services.

Awards and Achievements

- Jul 2025 📌 **Twelfth National Technology Parade**, Placed 5th out of 17 participants in the Security and Defense Technology Hub.
- Jun–Sep 2014 📌 **Jordan Math Competition**, Placed 2nd out of 5000 participants nationwide.

Certifications

- Mar 2026 📌 **Cypress 101** — TestMu AI
- Feb 2026 📌 **Google Ads Search** — Google
- Jan 2026 📌 **Industrial Networking Essentials** — Cisco
- Jan 2026 📌 **Network Technician Career Path** — Cisco
- Jan 2026 📌 **Introduction to Modern AI** — Cisco
- Nov 2024 📌 **Cloud Foundations** — AWS Academy
- May 2023 📌 **Introduction to Data Science** — Cisco
- Jul 2022 📌 **Introduction to Cybersecurity** — Cisco
- Apr 2022 📌 **Python Core** — Sololearn
- Oct 2021 📌 **Using Databases with Python** — Coursera

Personal and Course Projects

- Jun 2025 📌 **Decentralized Voting System on Ethereum Blockchain** — Developed a secure blockchain-based voting platform using Solidity smart contracts, MetaMask integration, role-based admin controls, and vote integrity enforcement with real-time results display.

Miscellaneous Experience (continued)

- Jan 2026  **Personal Portfolio Website** — Responsive portfolio with PWA offline support.
- Aug 2025  **SCADA Tank Level Monitoring System**
- May 2025  **ROS CPU Scheduling Simulation**
- Nov 2023  **Digital Multimeter Assembly on PIC16F877A Microcontroller**
- Jun 2023  **Assembly Language Projects** — Piano simulation and FPGA-based elevator circuit design.
- Jun 2021  **Arduino Uno Projects** — Fingerprint door lock, universal remote control, fully functional fan.
